King City, Ontario L7B 1A3

Dear Mr. Rokas,

You are receiving this package in invitation to collaborate as an engineer and equal-parts co-owner of Project Hyena. Project Hyena is currently in the ideation phase with an ambitious goal in mind: to develop an effective hydraulic regenerative automotive braking system which can be implemented into passenger vehicles already in service today. This aftermarket package will provide improved vehicle efficiency and operating costs by harvesting and preserving energy which would otherwise be lost to useless energy forms.

Your participation in this project is vital to its existence. As a studying Computer Engineer, the knowledge and skills you possess in programming, computer hardware and interfacing between electronic systems are necessary to the project. Please consider this invitation into high position in the project with the utmost professionalism and importance.

Additional information on the intended progression of the project as well as documents pertaining to introducing basic concepts related to the project are included in this package. Please be sure to sign and return the Project Confidentiality Agreement to the name and address at the top of this page. It is most convenient to return your response and paperwork in the shortest time after receiving this package to Corson Panneton.

Thank you for your time, I look forward to having you join the Project Hyena team. Please contact me with any questions or concerns with the terms of this offer.

Sincerely,

Corson Panneton
Founder of Project Hyena
